### FOR IMMEDIATE RELEASE

## **GED Introduces its new RC-2000® Twin-Head PVC Corner Cleaning System at Fensterbau Frontale**

**Twinsburg, OH** – GED Integrated Solution's (GED) revolutionary new RC-2000 Twin-Head PVC Corner Cleaning System will be showcased for the first time in Exhibit #3-106 in Hall 3 at the Fensterbau Frontale Trade Show, March 16-19, 2016 in Nuremberg, Germany. As part of GED's family of PVC Fabrication Technologies, the RC-2000 is considered by industry leaders as the first major change in the ideology of cleaning PVC windows and doors in over 20 years.

The RC-2000 was designed by integrating automation technologies that have been used effectively for years in markets where high volume, quality, safety and precision are top priorities. The technology? **ROBOTICS.**

This 12 axis robotic machine, with infinite axis possibilities, provides complete corner cleaning with no need for touch ups, consistent, repeatable movements and presentation of tools at unique and previously unattainable angles. Its patent-pending Star Hub rotates to present tools at multiple angles. Chatter is eliminated on a contoured surface, and quality remains consistent through Orthogonal cleaning – engaging the tool to the profile at the optimum angle no matter what the contour of the profile. The RC-2000 Robotic Cleaner additionally provides low maintenance as it is fully enclosed and self-contained with minimal exposed cable and moving parts and no exposure to PVC dust and chips to mechanical wear items.

While at Fensterbau Frontale, be sure to visit Exhibit #3-106 in Hall 3 where GED representatives will be on hand providing daily demonstrations.

As part of GED's complete line of glass and PVC window fabrication equipment and software, the RC-2000 Robotic Cleaner is fully backed by the company's industry-leading training and support services. For more information, call Chris Wale, European Sales Manager at +44 (0) 781-577-6089 or visit [www.gedeurope.com](http://www.gedeurope.com).

### **About GED Integrated Solutions, Inc.**

GED Integrated Solutions is a worldwide supplier of fully integrated insulating glass and pvc window and door fabrication systems, and the pioneer of the revolutionary Intercept i-3 Warm Edge spacer frame production system. The company's i-3 platform works with its LeanNet® communications software to integrate every facet of a plant's operation, increasing IG quality and production volumes and profits while decreasing operating costs and material wastage. GED's commitment to innovation that addresses its customers' needs is evidenced by the fact that 18 of the top 20 window and door manufacturers utilize GED's equipment and software solutions.
