

INTERCEPT® ULTRA STAINLESS STEEL SPACER SYSTEM

High performance custom engineered alloy for superior warm edge performance at the lowest cost produced by Intercept® Spacer Frame Machine

PROVEN TECHNOLOGY

Intercept Ultra is compatible with existing Intercept® IG equipment, matrix and sealants.

FEATURES

- ▶ One-piece Intercept spacer design
- ▶ Custom engineered .0077" gauge alloy material
- ▶ Computer-controlled production
- ▶ Proven U-channel design, with a billion Intercept IG units in windows today
- ▶ Integrated software permits direct downloading of batch information
- ▶ Achieve highest PVF™ rating (Performance Value Factor)

BENEFITS

- ▶ Provides superior structural integrity; faster and less expensive to produce than other spacers
- ▶ Specifically designed for IG gives added strength utilizing less material to provide superior warm edge performance
- ▶ Accurate and consistent high quality throughput with no manual intervention
- ▶ Provides superior thermal performance, durability and strength
- ▶ Lets you produce IG spacers just-in-time, in the order required, without operator errors
- ▶ The most economical spacer system with the highest warm edge performance

GIVING YOU GREATER CONTROL THAN EVER BEFORE.
