FEATURES

- ▶ Multiple Management Tree Viewers, Quickly displays production and remake schedule status.
- ▶ Schedule Detailed Section, displays the details of a selected schedule.
- ▶ Multiple Report Types for Production and Remakes.

BENEFITS

- ▶ Improves production efficiency; Managers can quickly see the status of production and remake schedules, what's made, what's in process, and what has not been started.
- ▶ Improves Tracking; Managers can see specific status information for any item in the schedule, "Unmade, Patched, Remake Ordered, Remake Scheduled".
- ▶ Identifies Problem Areas; Specialized reports allow managers to quick identify problem areas (Remakes by Location, Remakes by Reason, IG Production Status and Missing Units)

GIVING YOU GREATER CONTROL THAN EVER BEFORE

LeanNET® RemakeNOW Viewer

Consider GED for all your needs

The screenshot displays the RemakeNOW Enterprise Viewer application. The main window shows a list of schedules with columns for MasterDescription, ChildSched, ScheduleDescription, TrackNumber, Status, Reason, Location, DateOrdered, description, and TimeScanned. Below the list, there are buttons for 'Refresh', 'Special Ordered Glass', 'Location Summary Rpt', 'Dest. Summary Rpt', 'Reason Summary Rpt', 'Remake by Dest. Rpt', 'Remake by Location Rpt', 'Remake by Reason Rpt', 'IG Production Status Rpt', 'Missing Units Rpt', and 'IG Rpt per Date/Time'. On the right, there are 'Options' for 'IG Production Units view' and 'Remade Units view'. Below the main window, three smaller windows show detailed reports: 'Remake Now Enterprise Viewer Report - Remade units view by reason code', 'Remake Now Enterprise Viewer Report - Summary report by location code', and 'Remake Now Enterprise Viewer Report - Summary report by reason code'.
