FEATURES

- ▶ Progressive remake scheduling, using customer specific IG Tracking numbers, GED's Schedule ID Unit ID combination, plus interfaces with all common hand scanners.
- ▶ "Pre-Cut Glass Mapping" allows precut lites to be remapped to cut lites.
- ▶ "Special Order Glass" interface, stops remakes from being generated until glass has arrived.
- ▶ "Remote Remake Ordering" using GED's "Customer Business Interface Tables" or GED's "Ordering Stations".
- ▶ Enterprise Management Viewer (separate application for viewing and report printing).

BENEFITS

- ▶ Eliminates manual data entry of remake information at the various machines. Improves efficiency by eliminating incorrect and redundant ordering of remakes.
- ▶ Improves efficiency by removing the burden of retrieving pre-cut lites from inventory for repair units.
- ▶ Removes scheduling confusion when dealing with "Special Order Glass" remakes.
- ▶ Improves business efficiency by integrating with existing remake software and hardware.
- ▶ Allows management to view and analyze the entire IG production including scheduled units, unmade units and remakes over the network.
