

EM SERIES END MILLS

The EM Series of Manual and Automatic End Mills are designed for milling end contours on parts made from vinyl or aluminum extruded lineals. They can be customized with required cutter sets and fixturing to meet your specific milling requirements.

FEATURES

- ▶ Available in capacities up to 8" cutter stack, 15" mill travel and 10" cutter diameter
- ▶ Foot-pedal activated, pneumatically powered mill travel with hydrocheck control
- ▶ Customized fixturing and pneumatic clamping for individual applications
- ▶ Designed and manufactured in the USA

BENEFITS

- ▶ Select the appropriate model to meet your specific requirements
- ▶ Consistently clean and accurate cuts
- ▶ Fast and efficient with ability to mill multiple parts in one cycle
- ▶ Will provide long term continual operation with minimal maintenance and great availability of parts, today and into the future

GIVING YOU GREATER CONTROL THAN EVER BEFORE.
