GED Announces Launch of New Web Site

Twinsburg, OH - GED Integrated Solutions, Inc. (GED) today announced the launch of its new and improved web site. Along with its design and navigational tools, GED's new site features expanded content and streaming media including over 24 fabrication machine demonstration videos.

"Our newly upgraded and updated site is the result of two years of analysis, design and programming. GED's goal is to provide our customers and visitors, both domestic and international, with a compelling and informative virtual experience. From streamlining the site's navigation and making it much more intuitive and user-friendly, to adding an all-inclusive interactive tour of the Intercept® IG Spacer system, we are confident our visitors will experience ease and efficiency in rapidly getting to our resources." said Bill Weaver, CEO and President of GED.

The new site provides customers and visitors with a comprehensive overview of GED's wide array of award-winning vinyl window and door fabrication machinery, integrated software system solutions and solar manufacturing equipment. In addition to the site's many new technical features, the graphic design and interface present a dramatic improvement. Visitors to the site will find the aesthetic to be inviting and sophisticated.

Of equal importance, the site is organized to provide quick and direct access to all of GED's resources. If a user is not sure exactly where to look for specific information on www.gedusa.com, the newly developed site-wide search engine will be of benefit.

"As we look to the future, know that additional GED customer specific enhancements will be introduced, including on-line parts purchasing, educational resources, special offers and more." added Weaver.

For more information regarding GED's new web site launch, call 330.963.5401.

About GED Integrated Solutions

GED Integrated Solutions is a worldwide supplier of fully integrated insulating glass and vinyl window and door fabrication systems, as well as solar manufacturing equipment, and the pioneer of the revolutionary Intercept® i-3 Warm Edge spacer frame production system. The company's i-3 platform works with LeanNet® communications software to integrate every facet of a plant's operation, increasing IG quality and production volumes and profits while decreasing operating costs and material wastage. GED's commitment to innovation that addresses its customers' needs is evidenced by the fact that 18 of the top 20 window and door manufacturers utilize GED's equipment and software solutions.
