## **GED's new i-Sight software simplifies cost tracking with real-time reports, e-mail alerts direct from machinery**

Twinsburg, OH – March 6, 2008 – New i-Sight software from GED Integrated Solutions allows operations personnel to more accurately track and control manufacturing costs thanks to the industry's first real-time reporting link with production machinery.

i-Sight, another LeanNET® software innovation, enables machinery to instantly report actual material usage, cycle times and throughput in real-time. This virtual view of the production floor makes it easy for financial and upper management personnel to analyze detailed, to-the-minute production costs including unplanned manufacturing due to remakes, material problems, quality issues or process mistakes.

i-Sight also enables window machinery to email key personnel when emergency, preventative or predictive maintenance is needed so problems can be avoided before additional cost is incurred. By automating the reporting process, all of i-Sights features result in faster, more accurate control of manufacturing costs.

GED provides complete installation, training and customization of i-Sight software. For a free demonstration on how i-Sight can help control your manufacturing costs, contact Byron Clayton, NxWare Division of GED Integrated Solutions at [bclayton@gedusa.com](mailto:bclayton@gedusa.com) or 330-487-5095.

### **About GED Integrated Solutions**

GED Integrated Solutions manufactures fully integrated insulating glass and vinyl window and door fabrication systems including the revolutionary Intercept® i-3 IG spacer frame production system. The company's i-3 platform works with LeanNET communications software to integrate every facet of a plant's operation, increasing profit and getting orders out the door faster. GED's commitment to innovation that addresses its customers' needs is evidenced by the fact that 17 of the top 20 manufacturers utilize GED's equipment and software solutions.
