

GED SOFTWARE OVERVIEW

GET CONNECTED

▶ Use GED Software and GED production equipment together to create a fully integrated manufacturing environment

+ GED Software GED production equipment a highly productive facility

GED Software drives your IG and window production by connecting your front-end system directly to your glass and window fabrication systems. No one offers a more comprehensive manufacturing execution system (MES) to tie every aspect of your manufacturing process together than GED.

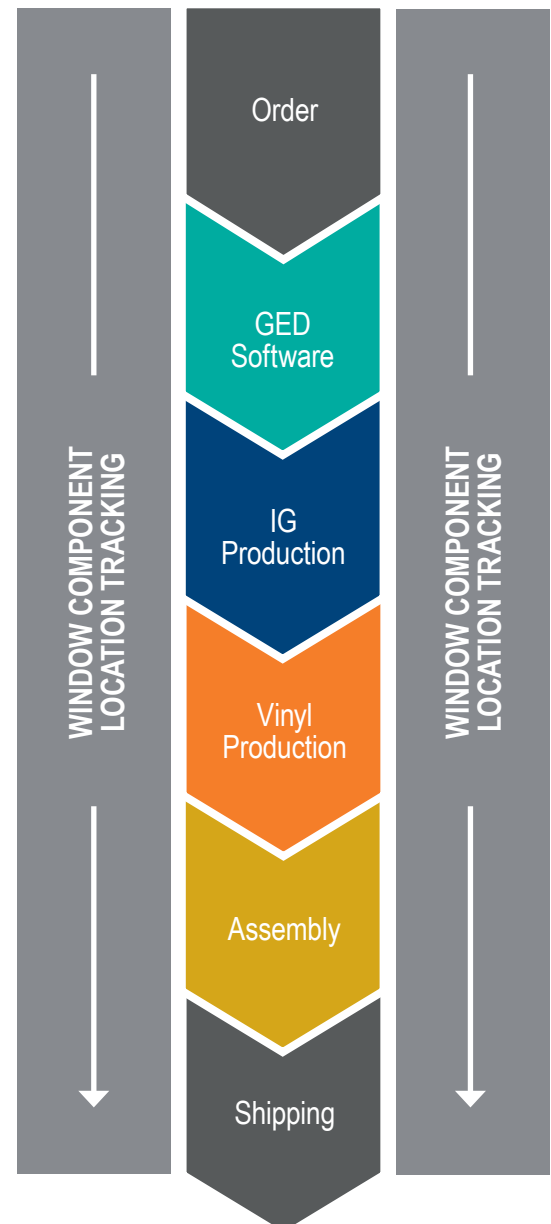

It was GED that first brought a holistic approach to production management software. Our award-winning, industry-leading software easily integrates with your current system, providing seamless connections for future expansion. Inherent flexibility allows GED Software to conform to your production requirements. When you want to synchronize every aspect of your operation, GED Software is the best choice.

TAKE CONTROL OF YOUR PRODUCTION PROCESSES AND ELIMINATE CONFUSION ON YOUR PLANT FLOOR BY INSTALLING PROVEN SOFTWARE DESIGNED TO:

- Connect your manufacturing floor
- Drive IG & vinyl production processes
- Integrate with existing systems
- Decrease lead times
- Save on labor costs
- Monitor quality & efficiency
- Reduce material waste
- Accommodate rush/remake orders easily

GED Software provides information manufacturers need to produce quality window, glass and door products by connecting every facet of their production process.

DATA FLOW

▶ 4-6% material yield improvement vs. competitors using GED optimization software*

PRODUCTS AND SERVICES

SCHEDULING SOFTWARE

Create, remake and control schedules for machinery to run, all from the comfort of your office. Organize, optimize and move schedules efficiently to the right machinery all while seeing the current state of production. This is schedule management made easy.

PRODUCTION CONTROL SOFTWARE

The power to monitor your machine throughput and follow units throughout your production processes is in your hands. See real-time statistics and tracking within your plant, and view production system statuses at a glance. From printing reports and labels directly at the machine to getting remake IG units back to the line as quickly as possible, GED Software helps take the chaos out of window production.

GED SOFTWARE

GED Software manages your production lines from beginning to end. From scheduling to machinery to process control, GED Software has got you covered.

MACHINERY SOFTWARE

Get face to face with GED machines using our machinery software that retrieves data from our scheduling software. Designed to optimize labor and reduce downtime, these applications focus on running production, not manually entering data. Select multiple schedules at a time using this user-friendly software and press GO!
