

Augmented Reality service experience

## **i** About

Get connected to GED’s support team from anywhere so they can see what you see and talk you through a solution in real time with the SmartVision System — the world’s first hands-free Android™ tablet class wearable computer for industrial workers. Using cutting-edge augmented reality (AR) technology, this hands-free, voice-activated system provides a faster, safer and smarter solution to troubleshooting equipment and performing preventative maintenance measures, all while wirelessly connected to a GED Technical Support representative.

## **✓** Features

- 100% Hands-Free – Voice based operating system with local speech recognition in loud areas
- Powerful Audio – Integrated speaker and 0.14in. (3.5mm) audio jack for use with hearing protection
- Unmatched Noise Cancellation – Uses four microphones and advanced algorithms to perform noise cancellation prior to voice recognition
- PPE Compatible – Designed to work with standard hard helmets, bump caps and safety glasses
- Full-Shift Internal Battery – Field swappable for continuous use
- Outdoor Display – Viewable in bright sunlight
- Waterproof – IP66 Protected against heavy seas or powerful jets of water
- Dust Tight – IP66 Complete protection against the ingress of micro particles
- Drop Proof – Resistant to over 6.5-foot (2-meter) drops onto concrete from any angle
- Built Rugged – Fully operational from -4°F (-20°C) to 122°F (+50°C)
- Connect through WiFi or mobile hotspot

World's first hands-free Android™ tablet class wearable computer for industrial workers.

Prost & Sullivan New Product Innovation Award for Industrial Wearables

**About GED Integrated Solutions**

GED Integrated Solutions, Inc. is the leading worldwide supplier of fully integrated insulating glass (IG) and vinyl window and door fabrication systems, and cutting-edge software process solutions, making it a single source for all your window production needs. With their revolutionary *Intercept*® warm edge spacer frame production systems, GED provides residential window and door manufacturers with the ability to make high-quality IG at levels unparalleled in the industry. Harnessing technology from robotics, automation and software, GED's intelligent solutions integrate every facet of a plant's operation, increasing IG quality and production volumes and profits while decreasing operating costs and material waste. The company's commitment to innovation addresses its customers' needs, evidenced by the fact that 22 of the top 25 window and door manufacturers utilize GED's equipment and software solutions to improve their profits and satisfy their customers.
