

Organize lites for efficient washing.

i About

Harp Carts organize lites as the computer software assigns a number to each cut lite. Carts are sold individually with numbered slots. Glass is delivered to the washer sorted in the proper order to match up with the spacer frames. The washer operator simply loads each lite in order from the cart. Also offered are 100-slot carts for single slotting glass.

✓ Features

- Rugged structural steel design with multiple base and divider options designed to fit your needs
- Designed by glass experts for multiple sizes and types to fit your plant requirements
- Labeled slots to fit with GED WinIG® software system
- Makes it easy to organize production for the rest of the plant

► **Standard Equipment & Options**

- Multiple base and divider options
- Multiple slot capacities

► **Preferred Service Package**
