PRODUCT OFFERING

GED Software

SCHEDULING & ANALYTICS SOFTWARE

Create, remake and control schedules for machinery to run, all from the comfort of your office. Organize, optimize and move schedules efficiently to the right machinery all while seeing the current state of production. This is schedule management made easy.

PRODUCTION CONTROL SOFTWARE

The power to monitor your machine throughput and follow units throughout your production processes is in your hands. See real-time statistics and tracking within your plant, and view production system statuses at a glance. From printing reports and labels directly at the machine to getting remake IG units back to the line as quickly as possible, GED Software helps take the chaos out of window production.

MACHINERY SOFTWARE

Get face to face with GED machines using our machinery software that retrieves data from our scheduling software. Designed to optimize labor and reduce downtime, these applications focus on running production, not manually entering data. Select multiple schedules at a time using this user-friendly software and press GO!
